About me

While pursuing my **BTech in Information Technology** at North Eastern Hill University, I took on the challenge of working as the **Chief Technology Officer (CTO)** at **Xeality Pvt Ltd**, balancing both my academics and leadership role simultaneously. I embraced this opportunity to gain **real-world experience** in managing and executing technological projects within a startup environment. This hands-on journey helped me develop **strong problem-solving skills, leadership capabilities, and technical expertise**, allowing me to contribute significantly to the company's growth. Additionally, I have worked as a **Technical Volunteer in the Office of International Affairs - NEHU**, assisting in university administration and technology-driven initiatives. I have also presented two international research papers on the **Philosophy of AI**. I am always eager to explore new challenges and leverage my skills in innovative projects.
