About me

I graduated with a **BTech in Information Technology** from **North Eastern Hill University** in **2025**. My passion for **Artificial Intelligence** and **automation** grew during my studies, leading me to work on several projects and, for broader industrial exposure, take up the role of **Staff Engineer at Xeality Pvt Ltd**. This position allowed me to balance **academics with leadership responsibilities** while gaining hands-on experience in **building, automating, and deploying websites**.

I have developed **AI Agents**, including a **web search agent**, an **email-sending agent**, and a **stock picker agent**, which are available on **Hugging Face Spaces** and **GitHub**. In addition, I have published **research papers on the Philosophy of AI** and written **articles on Medium** discussing its impact. Beyond research and projects, I actively create **content** to share knowledge about **AI, automation, and innovation**.

My long-term goal is to continue building and advancing **AI Agents** that can **automate workflows** and enrich **human-AI collaboration**.

Note: I have shared a link to my Hugging Face Space, where my live projects are deployed. You can directly access, use, and interact with them there. Please try them and let me know.

Skills

Programming Languages

- Python

Frameworks and Libraries

- Langgraph
- OpenAI SDK
- CrewAI
- SmolAgent
- Gradio
- TensorFlow

Design and Creativity

- Photo and Video Editing

Web Development

- HTML
- CSS
- WordPress

Professional Skills

- Project Management
- Execution
- Leadership
- Public Speaking
- Content Creation

Projects

AI-Stock-Market-Agent-with-CrewAI [🔗](#)

AI-powered Stock Market Agent that searches the internet for trending companies and recommends potential investments using Gemini 2.0 Flash Model.

Link: <https://github.com/gowthamsiddarthademan/AI-Stock-Market-Agent-with-CrewAI> [🔗](#)

Personalized AI Agent [🔗](#)

Developed a personalized AI agent that replicates my communication style and sends messages directly to my phone using PushOver. Here i used GPT 4o-mini model

Link: https://huggingface.co/spaces/futuretechnocratassociation/Gowtham_Digital_Clone [🔗](#)

Web Search and Email AI Agent [🔗](#)

Built an agent that searches the web, generates reports, and automatically delivers them via email using SendGrid by Twillio. Here i used Gemini 2.0 flash model.

Link: https://huggingface.co/spaces/futuretechnocratassociation/Research_Email_AI-Agent [🔗](#)

WhatsApp Notification AI Agent using OpenAI SDK

Designed an intelligent system that sends automated notifications through WhatsApp using Twillio. Here i used Gemini 2.0 Flash model.

Link: <https://github.com/gowthamsiddarthademan/WhatsApp-AI-Agent-> [🔗](#)

Earlier Detection of Alzheimer's Disease using Deep learning models

Build a CNN model for early detection of Alzheimer's disease

This is my Btech Final Year Project
